

Table 1: STB Options
(Predicted pricing for 1st Quarter 2008)

Terrestrial STBs

Type of STB	Operating System	Memory	Services	Applications	Features	Platform	Cost	CA	CA Options	No of Services/ 8 MHz
MPEG-2*	Embedded software	2MB Flash 4 MB RAM	FTA	Basic EPG	Remote Control	DTT	\$55	No	None	5
Entry level MPEG-4	Embedded software	4MB Flash 32 MB RAM	FTA	Basic EPG	Remote Control	DTT	\$70	No	None	10
Level 1A DTT MPEG-4	MHP capable**	8MB Flash 64 MB RAM	FTA Free Access Subscription	Data services E-Govt Sports results EPG Education Games Weather Reports etc.	Remote Control Closed Captions Additional Languages Parental Guidance	DTT	\$74	Capable	Dormant	10
Level 2A DTT HD MPEG-4	MHP enabled**	8MB Flash 128 MB RAM	FTA Free Access Subscription	Data services E-Govt Sports results EPG Education Games Weather Reports etc.	Remote Control Closed Captions Additional Languages Parental Guidance	DTT	\$90	Capable	Dormant	10

Satellite STB's

Level 1B Satellite MPEG-4	MHP capable**	8MB Flash 64 MB RAM	FTA Free Access Subscription	Data services E-Govt Sports results EPG Education Games Weather Reports etc.	Remote Control Closed Captions Additional Languages Parental Guidance	Satellite	\$74	Yes	Enabled (due to content rights protection)	10
Level 2B Satellite MPEG-4	MHP enabled**	8MB Flash 128 MB RAM	FTA Free Access Subscription	Data services E-Govt Sports results EPG Education Games Weather Reports etc.	Remote Control Closed Captions Additional Languages Parental Guidance	Satellite	\$90	Yes	Enabled (due to content rights protection)	10

All prices quoted are “ex-factory”

Retail prices are expected to be approximately 50% higher

*The Technical Committee does not recommend the adoption of MPEG-2 technology:

- MPEG-2 is reaching the end of its technological life and will soon be obsolete
- MPEG-2 is not capable of supporting high definition services (HDTV)
- In future the cost of MPEG-4 chipsets will be less than MPEG-2 chipsets

**Operating system royalties not included in pricing
